

# LONGLASTING PARTNERSHIP

**HVALPSUND NET**

Professional Fishing Outfitter

# A FULL RANGE OUTFITTER

# THE LEADING FISHING EQUIPMENT SUPPLIER

## FACTS

“Safety, comfort and catch handling and storage have dramatically improved in recent years and various new fishing possibilities have opened up... The vessels will continue to become more and more efficient and thereby reducing the level of work onboard.”

Source: EUROFISH Magazine  
JANUARY / FEBRUARY 2001 ISSUE

## From gillnets to hooks, ropes, work suits and boots

At Hvalpsund Net we have more than 7,500 different items in our stock. Most products are made in our own production facilities in Poland and Denmark. Besides a standard program we also develop and produce equipment specified to meet individual needs.

## Quality outfitting is essential

All our products are made of durable and strong materials as we offer only the best quality. All products are tested and we constantly work on optimizing our product range in order to meet the demands of modern fishing.

*To obtain a superior product quality we only use the best materials from recognized and trusted suppliers.*

# ONSHORE NET SOLUTIONS FOR SAFETY AND DURABILITY

## FACTS

“Working with heavy equipment and building materials on the limited space of a scaffold is difficult. Without fall protection or safe access, it becomes hazardous. Falls from such improperly constructed scaffolds can result in injuries ranging from sprains to death. An average of 362 fatal falls occurred each year from 1995 to 1999, with the trend on the increase.”

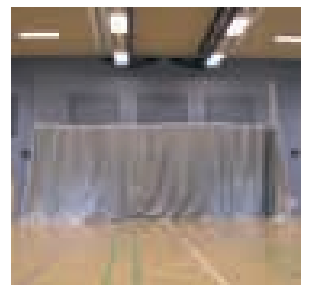

Source: U.S. Department of Labor 2007.

## Safety net solutions for the construction and building industry

Nets from Hvalpsund Net has the flexibility and strength to be used as safety nets and stepsafe footings in various onshore business areas. Our nets can be easily adapted to meet government requirements and has obtained approval from Technological Institute in Denmark.

## Special products

The use of nets in onshore situation is endless and at Hvalpsund Net we constantly develop new types of solutions to the agriculture sector, sports, playgrounds or transportation.

# FULL RANGE FISH FARMING SOLUTIONS

## FACTS

“Fish production is expected to increase globally by 40% to 130 million tonnes, with production being dominated by the developing countries (particularly Asian countries). Fish stock will continue to fish more heavily.

Aquaculture will increase its share of total food fish supply to 41%, and will show the strongest growth relative to capture fish.”
